PATENT

REMARKS

In response to a requirement made by the Examiner, Applicants elected to prosecute the invention defined by claims 1-41 and 47-50. Furthermore, the applicants elected the compound of claim 40, i.e. [(N-morpholinyl phenylamino)-methylene]-1, 3-dihydroindol-2-one. (Note this compound was incorrectly named in the Response of 3 June 2005.)

The Examiner has now rejected all of the claims under 35 USC § 102(b) as anticipated by Walter et al (2000). Applicants have now amended claim 1 to delete R¹ is NO₂ and R² is phenyl. This amendment overcomes the Examiner's rejection.

The Examiner has also rejected claims 1-41 and 47-50 under 35 USC § 102(a) as anticipated by Glennon et al.

The Applicants have amended the claims to overcome the rejection by deleting R¹ is bromine.

The Examiner has rejected claims 1-41 and 47-50 for obviousness-type double patenting over U.S. 6,765,012. This rejection is now overcome by filing a Terminal Disclaimer herewith.
